Honda North America

Supplier Green Excellence Resource

Presented by: HDMA Business Operations, Sustainability Team

November 2025

HONDA
The Power of Dreams

Welcome

At Honda, we believe that in order to grow and to thrive, we must continue to be a company that "society wants to exist." Sustainability is a key component of our corporate strategy, and we aim to partner with suppliers who share our vision and goals.

We released the Honda North America Supplier Sustainability Excellence Framework to offer insight on how you, a key supplier, can foster sustainability excellence within your own organization across Honda's seven categories of sustainability.

This resource will provide additional insight on two exciting partners that will help you achieve sustainability excellence within our 'Environment' category:

1. **Manufacture 2030 (M2030),** a required Carbon Reduction Platform for Honda suppliers; and,
2. **Trio,** an expert resource to guide you throughout your sustainability journey, from education and goal setting to implementing your decarbonization strategy.

As a key supplier, we ask for your support in pursuing our ambitious environmental targets and helping Honda work towards our **Triple ZERO Vision:**

CARBON NEUTRAL
Net zero product emissions.

CLEAN ENERGY SHIFT
100% carbon-free energy.

RESOURCE CIRCULATION
100% sustainable materials with zero water intake and zero waste output.

Together, we can reduce our impact on the environment and achieve our sustainability goals.

MANUFACTURE M2030

Required Program for Honda Suppliers

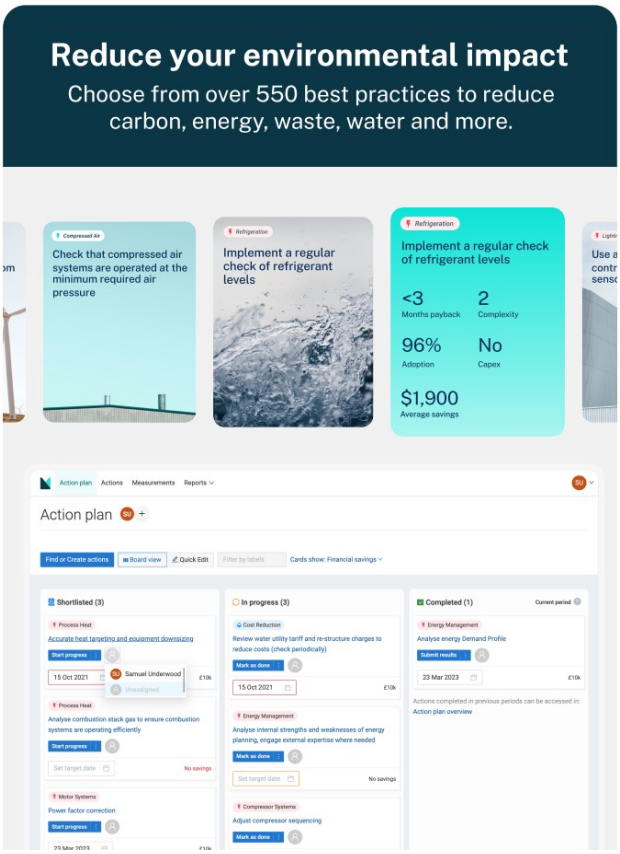

Reduce emissions, align with Honda's targets, and drive down business costs via one simple platform that adds value for your operational and corporate teams.

M2030's carbon reduction platform and supplier success team make it easy for you to help Honda and other automotive customers meet their carbon commitments, strengthening relationships while identifying targeted opportunities for you to enhance the environmental reputation and commercial performance of your business.

LEVERAGE THE M2030 PLATFORM TO:

- Identify new reduction opportunities;
- Connect with a global network of peer suppliers;
- Reduce duplication of customer reporting efforts;
- Access a partner network (i.e., green financing);
- Drive down costs and risks; and,
- Secure competitive advantage.

Supplier Sustainability Scorecard Support

MANUFACTURE 2030

	Honda Scorecard Requirement	M2030 Support
Bronze	Achieve annual 5.7% (+) absolute CO2e reduction target and report annually in M2030.	Track your emissions reductions using the integrated glidepath dashboard, which helps visualize progress toward Honda's annual 5.7% target. Use tools like "How to use reports to manage your environmental footprint," "How to build your reduction plan," and "How to add your organization's internal targets to the platform" to stay aligned and report effectively.
Bronze	Complete M2030 questionnaire annually.	Submit your environmental data through the "Measurements" section of M2030. To prepare, review the customer measurement checklist, explore where to find and collect the required data, and confirm your submission status with "How to check if your submission is complete."
Silver	Source a minimum of 10% carbon-free energy.	Begin your clean energy transition by connecting with M2030 decarbonization partners. M2030's guide on procuring and funding renewable energy for your business offers practical steps to meet the 10% carbon-free energy threshold.
Silver	Demonstrate CO2e reductions of at least 34%.	Use the glidepath view to monitor and report your progress toward Honda's 34% reduction goal. Resources like "How to use reports to manage your environmental footprint," "How to build your reduction plan," and "How to add your organization's internal targets to the platform" will support your journey.
Gold	Achieve carbon neutrality in alignment with Honda's Triple ZERO Vision.	Build your carbon neutrality roadmap using M2030's integrated planning tools. The glidepath view, paired with resources like "How to use reports to manage your environmental footprint," "How to build your reduction plan," and "How to add your organization's internal targets to the platform," will guide your progress and reporting.
Gold	Source a minimum of 50% carbon-free energy.	Accelerate your renewable energy adoption with help from M2030's decarbonization network. Learn how to meet the 50% target through M2030's guide on procuring and funding renewable energy for your business, which outlines sourcing strategies and financing options.

TRIO™

Honda's Strategic Decarbonization Partner
As part of its commitment to reducing supply chain emissions, Honda has engaged Trio to provide complimentary resources to guide you in your sustainability journey.

Trio is a sustainability and energy advisor, committed to promoting a sustainable, resilient, and equitable future.

Honda Green Excellence Academy

If your company is ready to reduce carbon emissions, mitigate risks, and control energy costs, Trio can partner with you to deliver results.

Join the Honda Green Excellence Academy to take action on:

- Developing a sustainability strategy.
- Buying renewable energy.
- Reducing energy consumption.

To get involved, visit:

www.trioadvisory.com/honda-green-excellence-academy-powered-trio

Contact the Trio team:

hondagreenexcellence@trioadvisory.com

The Honda Green Excellence Academy is free to Honda suppliers and meets you at any stage of your climate journey:

LEARN WHAT'S AVAILABLE

Access webinars and written resources which provide foundational knowledge for:

- Creating the business case for reducing carbon emissions.
- Setting sustainability goals.
- Buying renewable energy.
- Reducing energy consumptions.

TAKE THE NEXT STEP

Complete a feasibility assessment to learn what carbon reduction actions are right for you. Assess options for reducing emissions such as:

- Setting carbon reduction targets.
- Implementing onsite solar.
- Buying green energy.

TAKE ACTION

Join a cohort and leverage action-oriented resources to make real emissions reductions:

- Set a carbon reduction target.
- Install energy efficiency measures.
- Buy green energy.

TRIO™

Honda's Strategic Decarbonization Partner

As part of its commitment to reducing supply chain emissions, Honda has engaged Trio to provide complimentary resources to guide you in your renewable energy procurement journey.

Trio is a sustainability and energy advisor, committed to promoting a sustainable, resilient, and equitable future.

Transform: Auto Program

TRANSFORM: AUTO
POWERED BY TRIO

If your company is ready to reduce carbon emissions, mitigate risks, and control energy costs, Trio can partner with you to deliver results.

Transform: Auto helps suppliers learn about and procure renewable energy through:

- Electric Utility Programs
- Onsite Solar
- Community Solar
- Renewable Energy Certificates (RECs)
- Utility-Scale Power Purchase Agreements

To get involved, visit:

www.transform-auto.com

Contact the Trio team:

transformauto@trioadvisory.com

The Transform: Auto program is free to all Tier 1 Honda suppliers and is designed to support companies at all maturity levels in procuring renewable energy in North America.

HOW TRANSFORM: AUTO WORKS

1. **Register**
   Create an account at transform-auto.com.
2. **Create Profile**
   Indicate the locations you're interested in and your experience with renewables.
3. **Tune In**
   Begin "learning pathways" on the portal and sign up for live educational webinars.
4. **Join**
   Opt in to "Actions" to assess feasibility and proceed with renewables procurement.
5. **Reduce**
   Implement renewable energy projects and reduce emissions.
